SUMMARY:

I ended up loving technology after working as a journalist and a librarian. I discovered web development when I decided to make my own site using a WordPress child theme. From there, I was hooked and decided to go to the New York Code Academy for their 16-week evening program to learn more about front-end web development. My goal is to find a collaborative culture where I could grow my skills as a web developer and be an asset for a forward-thinking company.

SKILLS:

HTML5, CSS3, SASS, Javascript, JQuery, responsive web design, WordPress, Git, Github, Google Analytics.

WEB SITE PROJECTS:

- **Cool Paintings** (Final project site that used HTML, Javascript, Bootstrap and advanced CSS selectors)
http://nycda.zone/david626/Final_Project/pages/
- **Davidakoch.com** (Brochure resume site that used WordPress child themes and plugins)
- **Developers Against Animal Testing** (Collaborative class website that used HTML, CSS, Javascript)
<http://nycda.zone/david626/collabsite/pages/>
- **Carts R' Us** (For fans of Caddyshack)
